MEMORANDUM FOR: Office of Joint Computer Services/AD

25X1A

ATTENTION :

SUBJECT : OC MAP CONTROLLED PROPERTY Data Base

REFERENCE : OC-M-73-496, Para 2b, 31 August 1973

The attached information on OC MAP CONTROLLED PROPERTY data base requirements is forwarded to assist you in your OC MAP requirements analysis. At your convenience, we will schedule a meeting with the OC Project Managers to answer questions and provide additional information as appropriate.

World-Wide Equipment Report - (OC-E)

- a. Report format as in the attached sample is satisfactory.
- b. Data elements (identified on the sample) do not require modification.
- c. Received semi-annually.
- d. Report currently exists.
- e. Sources of data for the report are world-wide communications facilities.
- f. OC-E/SED/FAB is responsible for updating.
- g. On-line capability is neither required nor desired.

Equipment Failure Reports - (OC-E)

Equipment Failure Reports are generated in four types of breakout from the one data base. Those are:

Total Failures World-Wide by equipment type
Failures by Geographic Area
Failures by Circuit Symbol No. (i.e., component)
Failures by Station

- a. The present formats (of which a sample is attached) are satisfactory.
- b. Data elements (identified on the sample) are as desired.
- c. The reports are currently produced on a semi-annual basis; the user component would prefer quarterly reports.
- d. The reports already exist.
- e. The data source is a pre-printed form filled in and pouched to Headquarters by field stations encountering equipment failures. Transmission to Headquarters is being converted from pouch to electrical means, with reception in the user office.
- f. The user (OC-E/ESD/TSB/R&R) is responsible for update. Information received from the field is transcribed onto a form which is delivered to OJCS for keypunch.
- g. On-line capability is not required. The user does wish to investigate means of avoiding the keypunch logjam and verification process, possibly with a small processor and VDU entry device in his area permitting data entry and program execution there with OJCS providing the voluminous, multi-copy (some 30 copies) print-out from mag tape.

MEMORANDUM FOR: Office of Joint Computer Services/AD

25X1A

ATTENTION :

SUBJECT : OC MAP SUPPLEMENTAL REPORTS

REFERENCE : OC-M-73-496, Paragraph 2d

1. Attachment 1 is a partial listing of OC ADP MAP requirements which are categorized in the reference as SUPPLEMENTAL REPORTS. This partial listing is made up of management reports prepared by the Staff Communications Division, OC, relating to network status and workload.

2. The Cable Traffic Analysis (CATRAN) report is currently being produced by computer in a batch mode. However, the procedures for updating the data base and extracting management reports are essentially manual and therefore laborious and time consuming. It is a very important element of the office management process, and we attach considerable importance and priority to getting the CATRAN reports process revitalized.

3. Attachment 2 consists of samples and descriptions of reports. At your convenience, we will schedule a meeting with the OC Project Managers to answer your questions and provide additional information as appropriate.
